Dear sir,

I confirm by this letter that the company Industry Control Ltd. implemented for our company technical activities in the field of control valves within the "Reconstruction and modernization of production POX - V. phase" in Unipetrol RPA.

The technical activities was extensive preparatory phase, which consisted of assembling the original technical documentation of control valves (lifetime of installed control valves were 30 years on average), current revision process data and calculation of control valves. All of these activities, including the selection of new valves, were conducted under the supervision of Industry Control Ltd.

Subsequent operation of reconstructed unit proved that all these activities have been carried out correctly and in accordance with the new requirements of production.

Completion date: 2006 - 2007

Number of control valves: 125

Contact: Martin Dorňák, Project Manager, phone number: +420 724 246 366

Best regards

Vladimír Latocha
